Agents

Create agent

Create an agent.

Security > ApiKeyAuth

Request ▾

REQUEST BODY SCHEMA: application/json
required

The agent's details

additionalEmails

Array of strings **unique**

Additional email addresses for the agent

additionalPhoneNumbers

Array of strings **unique**

Additional phone numbers for the agent

avatarUrl

string

The url from which to load the agent's avatar

displayName

required

string
The agent's display name

email
required
string
The agent's primary email address

firstName
string
The agent's first name

lastName
string
The agent's last name

middleNames
Array of strings
The agent's middle names

phoneNumber
string
The agent's primary phone number

List agents

Lists all agents/admins in an organization. It is possible to filter by one of the mutually exclusive parameters: email or phone number. In case both are provided, an error is returned.

Security > ApiKeyAuth

Request ▾

QUERY PARAMETERS

email

string

The agent/admin email filter

pageKey

string

Base64 encoded form of pagination query parameters. Do not try to construct or change programmatically as the internal structure may change without notice.

pageLimit

integer <int32>

Maximum number of results per page. May be used in combination with pageKey to change the number of results in between page requests.

phone

string

The agent/admin phone number filter
