Integration API migration guide

We are sunsetting the Integrations API, and here you will learn everything you need to migrate to the Dixa API. And don't worry. We have made an easy-to-use mapping between Integrations and Dixa API endpoints and fields.

- First, you should read about how to access the Dixa API. You can read about how to create an [API token in this tutorial](#).
- Secondly, you must identify the systems that are still using the Integration API. You will need this to understand which Integrations API endpoints you are currently using.
- Finally, use the table below to find the Integration API endpoints and the matching Dixa API endpoint in the column to the right.

Conversations

Name	Integrations API	Dixa API
Get a list of activitylog events	GET integrations.dixa.io/v1/conversations/activitylog/	GET dev.dixa.io/v1/conversations/activitylog
Get a list of activitylog events for a conversation	GET integrations.dixa.io/v1/conversations/{csid}/activitylog	GET dev.dixa.io/v1/conversations/{conversationId}/activitylog
Add a historical message to a conversation	POST integrations.dixa.io/v1/conversations/{csid}/messages/historical	POST dev.dixa.io/v1/conversations/{conversationId}/messages
Create a conversation	POST integrations.dixa.io/v1/conversations	POST dev.dixa.io/v1/conversations

Name //	Integrations API //	Dixa API //
Get a list of internal notes of a conversation	GET integrations.dixa.io/v1/conversations/{csid}/notes	GET dev.dixa.io/v1/conversations/{conversationId}/notes
Get a list of messages within a conversation	GET integrations.dixa.io/v1/conversations/{csid}/messages	GET dev.dixa.io/v1/conversations/{conversationId}/messages
Get a single conversation by id	GET integrations.dixa.io/v1/conversations/{csid}	GET dev.dixa.io/v1/conversations/{conversationId}

Anonymization

Name //	Integrations API //	Dixa API //
Get anonymization request for specified id	GET integrations.dixa.io/v1/anonymization_request/{requestId}	GET dev.dixa.io/v1/anonymization/request/{requestId}
Schedule anonymization for specified entity	POST integrations.dixa.io/v1/anonymization_request	PATCH dev.dixa.io/v1/conversations/{conversationId}/anonymize PATCH dev.dixa.io/v1/conversations/{conversationId}/messages/{messageId}/anonymize PATCH dev.dixa.io/v1/endusers/{userId}/anonymize

Endpoints

Name //	Integrations API //	Dixa API //
Get a list of endpoints	GET integrations.dixa.io/v1/endpoints	GET dev.dixa.io/v1/contact-endpoints
Get an endpoint by id	GET integrations.dixa.io/v1/endpoints/{id}	GET dev.dixa.io/v1/contact-endpoints/{contactEndpointId}

Flows

Name //	Integrations API //	Dixa API //
List the current flows for an organization	GET integrations.dixa.io/v1/flows	GET dev.dixa.io/v1/conversations/flows

Queues

Name //	Integrations API //	Dixa API //
Get a list of queues for your organization	GET integrations.dixa.io/v1/queues	GET dev.dixa.io/v1/queues
Get a queue by id	GET integrations.dixa.io/v1/queues/{id}	GET dev.dixa.io/v1/queues/{queueId}

Tags

Name //	Integrations API //	Dixa API //
Get a list of tags	GET integrations.dixa.io/v1/tags	GET dev.dixa.io/v1/tags

Users

Name //	Integrations API //	Dixa API //
Create a user	POST integrations.dixa.io/v1/users	POST dev.dixa.io/v1/enders
Returns a list of conversations requested by a specific user	GET integrations.dixa.io/v1/users/{userId}/requested_conversations	GET dev.dixa.io/v1/enders/{userId}/conversations

Name	Integrations API	Dixa API
Returns a list of users	GET integrations.dixa.io/v1/user	GET dev.dixa.io/v1/enders GET dev.dixa.io/v1/agents
Return a single user	GET integrations.dixa.io/v1/user/{userID}	GET dev.dixa.io/v1/enders/{userId} GET dev.dixa.io/v1/agents/{agentId}

Why Dixa	Product	Capabilities	Resources
Fast	Take a tour	Conversational	Blog
Efficient	Phone	Prioritization	Insights
Effective	Email	Personalization	Help center
Dixa vs. Zendesk	Chat	Integrations	Product releases
Dixa vs. Kustomer	Facebook	All capabilities	
Dixa vs. Freshdesk	Whatsapp		
	Desktop App		
	Customer stories		

Solutions	Company
